## Bathing rules

---

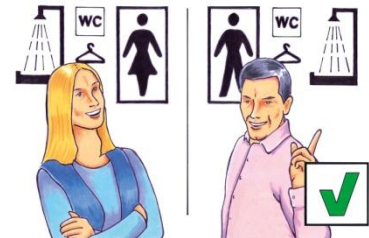

## Your safe use of our swimming pool

You are welcome in our swimming pool, which is a place for recreation and sport, for playing games, and having fun. But it is also a place that requires your attention and caution to avoid risks and to make the stay in the swimming pool a pleasure for all pool users. The following information is intended to help you to achieve this goal.

Street clothes are not allowed in the swimming pool, but only swimwear (swimming trunks, swimming shirt, bikini, burkini) from appropriate material.

Men and women use separated changing rooms, showers and toilets.

Washing thoroughly with shower gel before entering the swimming pool.

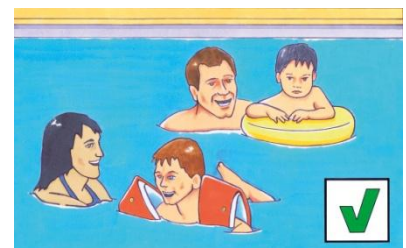

Non-swimmers may only use the non-swimmers space and go up to the level of their bellies into the water.

Take special care of the transition (dividing rope) from the non-swimmers-area to the swimmers-area. If you are not sure where this transition is, please ask our staff.

The use of the swimmers pool or swimmers area is only allowed for safe swimmers. Deep water is dangerous for non-swimmers. Please do not overestimate your strength and your abilities.

Children are especially endangered near the water; they have to be supervised by appropriate attendants permanently. Children are in danger of drowning even in shallow water and must be supervised permanently there too. Please note that swimming aids cannot provide perfect safety.

Children and the elderly must especially be considered.

Other persons may not be pushed or submerged into the water.

The water must be deep enough to jump and to be free.

Sexual harassment is not tolerated in any form, whether by gestures, expressions or touches. Women are to be respected, regardless of their swimwear.

Photographing and filming external persons without their consent are not permitted.

In our team, men and women work equal before the law, and their instructions must be followed.
